Art Unit: 1743

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to a coated object, classified in class 428, subclass 1.1+.
- II. Claims 26-40, drawn to a coated composition, classified in class 106.
- III. Claims 41-44, drawn to a method of detecting a solvent, classified in class 436, subclass 164.

The inventions are distinct, each from the other because of the following reasons:

Inventions II, and I III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an ornamental colored display. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a method of detecting a solvent. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
